*** NOTE: The attached PTO-1449 shows the correction by the Examiner to the name of U.S. Pat. No. 5,986,898, from "Thomson" to "Meitzner et al.". ***

The following is an Examiner's Statement of Reasons for Allowance: Applicant's arguments presented in the Response of 3/19/04 have been thoroughly considered and are convincing. The Examiner is in agreement in that the Prior Art of Record does not disclose nor suggest the claimed combination found within Independent Claim 8. Although Nilssen discloses the use of fast diodes within a bridge, there does not appear to be any description of the first (C11) and second (C12) capacitors of Meitzner et al.. One is only left with hind-sight for the motivation to apply such capacitors to the disclosure of Nilssen, as well as, connecting their junction point to the pole, which lies between one of the first and second pairs of diodes **other** than the pair of fast diodes.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ronald W Leja whose telephone number is (571)272-2053. The examiner can normally be reached on Monday thru Friday.
